IDEA TITLE

SMART INDIA HACKATHON 2025

❖Proposed solution

- **Voice assistant** supports regional languages for easy, hands-free interaction.
- **Farmers** can ask questions verbally and receive instant spoken responses and they can also get text responses
- **Icon-based interface** simplifies navigation for users with low literacy.
- Each **icon** represents a key function like crop advice, market rates, or schemes.
- **Voice and icon** inputs work together to guide users step-by-step.
- **Minimal text** ensures accessibility across age groups and education levels.

FEASIBILITY AND VIABILITY

SMART INDIA HACKATHON 2025

- **Feasibility**: Can be built using existing voice tools and icon-based mobile design.
- **Device compatibility**: Works well on basic smartphones used by most rural farmers.
- **Challenge**: Voice assistant may misinterpret local accents or background noise
- **Risk**: Some users may hesitate due to low digital literacy or fear of tech.
- **Strategy**: Use offline voice models and noise filters to improve accuracy.
- **Support**: Add a simple voice-guided tutorial to help new users feel confident
- **Future Outcomes :** Image Query , Market Trends , Translation
